SOMPO
INTERNATIONAL

Sompo International is the trade name for the global specialty property and casualty insurance and reinsurance operations of Sompo Holdings, Inc. ("Sompo"), established in March 2017 as the result of Sompo's acquisition of Endurance Specialty Holdings Ltd.

Sompo is a financial services holding company organized under the laws of Japan whose shares are listed and posted for trading on the Tokyo Stock Exchange. Sompo, through various operating subsidiaries, is one of the top three insurers in Japan and is engaged in the provision of insurance services as well as other related services through its global network of businesses operating in 32 countries around the world.

Sompo International is the international operation of Sompo and, through its operating subsidiaries, writes agriculture, casualty and other specialty, professional lines, property, marine/energy and aviation lines of insurance and catastrophe, property, casualty, professional lines and specialty lines of reinsurance.

As a leading global provider of insurance and reinsurance, we recognize that our success is derived directly from those whose contributions matter most: our people. Sompo International's headquarters is in Bermuda and we currently have offices in the United States, the United Kingdom, Continental Europe, and Asia. A shared commitment to integrity, accountability, collaboration and agility define our culture, and we strive to create exceptional value for our clients and shareholders and maintain Sompo International as a desirable place to work.

We are seeking a **Sr. Web Developer** to join our team in our **Purchase, NY, New York City or Florham Park, NJ** office.

Main areas of responsibility:

Plan, design, develop, modify, debug and evaluate web portal solutions. Serve as technical lead for all portal projects and services:

- Establish and execute traceable unit and integration tests
- Configure operational parameters such as role and permissions, user attributes, etc.
- Provide delivery plans and estimates for work effort on assigned projects.
- Own and maintain Liferay portal environment. Establish standard guidelines for designing and developing secure, supportable, reusable, service-oriented and performing solutions.
- Understand and apply industry practices, architectural standards and department policies and procedures relating to work assignments.
- Troubleshoot and resolve technical issues as they arise

Qualifications, Skills and Experience:

- At least 5 years of experience developing and implementing enterprise-level Java applications:
  - 5+ years of Java/J2EE application design and development experience
  - Experience with OSGI or similar framework
  - Experience with MVC design pattern
  - Experience with Hibernate/Spring frameworks
  - Experience implementing and utilizing Web services, Service/System Integrations
  - Strong Web UI development skills (i.e. HTML, CSS, JavaScript)
  - Development experience utilizing Vaadin framework is a plus
  - Ability to translate business requirements into technical requirements
  - Experience delivering technical design & architecture documentation
  - Experience with code management tools, automated build setup, and deployment procedures
- 3+ years of strong Liferay hands-on experience:
  - Experience delivering extranet/customer portals from start to finish
  - Experience configuring Liferay sites and organizations with permissions
  - Experience developing portlets, custom themes, and WCM features in Liferay
  - Experience implementing logging, usage metrics, audit trail, and usage analytics components
  - Experience installing, configuring, and administering Liferay applications in both production and non-production environments
  - In-depth understanding of Liferay platform and development best practices
  - Project experience with Liferay 7 (DXP) is preferred
  - Knowledge of Liferay 7 (DXP) is required
- Experience working with and leading offsite teams is required.
- Must have strong analytical and problem solving skills.
- Integration with enterprise systems and overall architectural standards knowledge.
- Personal time management skills and ability to meet individual and team deadlines.
- Excellent communication presentation and organization skills with ability to communicate effectively across multiple IT team disciplines and with business users.
- Insurance industry experience is a plus
- Bachelor's degree in computer science, management information systems, mathematics or related field is strongly preferred.
