Sompo International is the trade name for the global specialty property and casualty insurance and reinsurance operations of Sompo Holdings, Inc. ("Sompo"), established in March 2017 as the result of Sompo's acquisition of Endurance Specialty Holdings Ltd.

Sompo is a financial services holding company organized under the laws of Japan whose shares are listed and posted for trading on the Tokyo Stock Exchange. Sompo, through various operating subsidiaries, is one of the top three insurers in Japan and is engaged in the provision of insurance services as well as other related services through its global network of businesses operating in 32 countries around the world.

Sompo International is the international operation of Sompo and, through its operating subsidiaries, writes agriculture, casualty and other specialty, professional lines, property, marine/energy and aviation lines of insurance and catastrophe, property, casualty, professional lines and specialty lines of reinsurance.

As a leading global provider of insurance and reinsurance, we recognize that our success is derived directly from those whose contributions matter most: our people. Sompo International's headquarters is in Bermuda and we currently have offices in the United States, the United Kingdom, Continental Europe, and Asia. A shared commitment to integrity, accountability, collaboration and agility define our culture, and we strive to create exceptional value for our clients and shareholders and maintain Sompo International as a desirable place to work.

We are seeking a **Microstrategy Architect** to join our **Data and Business Intelligence** team in our **Purchase, NY** office.

Main areas of responsibility:

The MicroStrategy Architect is responsible for architecting, designing and delivering successful MicroStrategy projects. The Architect must have a strong understanding of the architecture, design, development and deployment of scalable, reliable, redundant business intelligence systems and data warehouses using the MicroStrategy BI tools and analytical database platforms.

- Design and develop analytics solutions using Microstrategy toolset: self-service reporting structures, dashboards, and reports for internal and external use

- Model or architect MicroStrategy Schema Objects for the BI applications including schema/modeling, dashboards/documents/reports + mobile application

- Formulate and recommend standards for achieving maximum performance and efficiency of MicroStrategy solutions

- Work with IT and business teams to understand requirements, conduct analysis and communicate solution options

- Work with data modelers and ETL developers to make sure data structures and content support analytics and reporting requirements

- Develop reports and dashboards to monitor BI applications providing insight on usage patterns and recommend application/system improvements

- Support MicroStrategy applications in Production by providing Level 3 support, which includes provisioning and implementation of fixes to production defects and making light enhancements

- Champion data quality, integrity and reliability by designing and promoting best practices

- Contribute and participate in MicroStrategy design and code reviews

- Assist in the planning and delivering of multiple projects

- Work with software vendors to open defects, log issues and seek resolutions and/or patches

- Evaluate incidents/defects, investigate, identify root cause and come up with solutions to address them

Minimum Qualifications:

Candidates must have deep technical expertise and hands-on MicroStrategy implementation experience including:

- MicroStrategy Architecture: 5 years

- MicroStrategy Security Administration: 5 years

- MicroStrategy Development: 8 years

- Extensive experience with MicroStrategy schema definition, design, implementation and maintenance

- Extensive experience with MicroStrategy's dynamic dashboard, report development, and project design: facts, attributes, hierarchies, aggregation, and portal integration

- Hands-on experience with MicroStrategy SDK for customizations of both the Web & Mobile Apps

- Working knowledge of BI architecture, data warehousing concepts, and data visualization best practices

- Experience with application object development, including metrics, templates, and filters

- Experience in configuring, governing, trouble shooting, and tuning the Intelligence Server

- Extensive experience with MicroStrategy Security Administration

- Experience with relational structures, dimensional data modeling, SQL skills, Data Warehousing and reporting techniques

Preferred Qualifications:

- MicroStrategy certifications

- Excellent oral and written communication skills and effectively communicate details with all levels of management

- Adept and proactive at problem-solving

- Demonstrate strong analytical skills and develop solutions to problems independently and through facilitated team discussions

- Prioritizes workload, multi-tasks, meets deadlines and manages competing priorities under pressure

Education:

- A Bachelor's Degree in computer science, engineering, finance or related field; Master's degree preferred

Sompo International offers a competitive compensation and benefits package commensurate with experience. For consideration; please e-mail your resume along with salary history/requirements to: abenincaso@sompo-intl.com.
