

U.S. Capabilities to Service the Construction Industry

Sompo International Insurance provides a broad suite of primary and excess products and services tailored to commercial, residential, infrastructure and institutional construction classes.

- Our coverages are designed for the unique risk exposures of A&E firms, developers, owners, construction managers as well as general and trade contractors.
- We underwrite on both a practice and project-specific basis, offering multiline capabilities across lead and excess layers for risks of all sizes.
- Our dedicated in-house claims team takes an integrated approach across products, based on extensive experience in construction claims – from equipment theft to complex construction site accidents.
- We offer our clients a broad range of risk management and loss control services tailored to construction risk profiles, designed and delivered by in-house experts working closely with our underwriting teams and our network of professional engineers and loss control vendors.
